A winner of Fashion Group International of Dallas' Rising Star in Interior Design award, Shay Geyer has been designing professionally since 2001. Her passion for interiors, bright color, pattern and luxe texture make creating beautiful spaces for clients a dream job.

Inspired by travel, art, family and friends, Geyer's goal in design is to create an inviting atmosphere that reflects the personal taste of each client. Her designs infuse unique elements and statement pieces with comfortable, family-friendly living.

"I think having children makes you not only consider the aesthetics of design but to also put emphasis on practicality and functionality," says Geyer, who has two daughters named Jaylie and Brooklyn. "For the modern mom, multi-tasking and livability is key. Our family is always on the go, so it's not unusual for me to be picking a paint color or sourcing for a

project while cooking dinner. If something gets spilled, clean up needs to be quick and easy. I look for fabrics that can be easily cleaned and options that can handle our client's needs. I also approach furniture layouts and selections with the whole family in mind."

These days, the designer is working on projects all over the world—Cabo San Lucas, Turks and Caicos, Florida, Utah, Tennessee and beyond. "Many of our clients have purchased or are building vacation homes in the last year, so we are working on several mountain, beach and lake house properties."

We can't wait to see them in the *IBB at Home* magazine!
